PARTNERS

INTRODUCTION TO TUATARA

COMPANY SUMMARY

Tuatara Consulting is a Veteran owned Management Consulting and staffing firm that meets our customers where they are on their respective journeys. Our consultative approach is technology agnostic, business outcome focused, and geared towards delivering solutions aligned to our customer's business initiatives. Each solution targets cost reduction, revenue production, or profit improvements. We are partnered with several of the major cloud platform providers enabling our solutions to be architected and integrated with the technology that makes the most sense for our customers.

Technologies served: Google Cloud, Microsoft, ServiceNow, Salesforce, IBM Cloud and Legacy AS/400, many more!

SERVICE OFFERINGS

Business Strategy

- We help companies devise and execute strategies aligned with corporate initiatives and designed to transform, modernize, and leverage modern technologies to win. We help plan, build, implement, measure for effect, and adapt to secure the desired outcomes.

Data Analytics, RPA, ML, and AI

- We build data solutions that surface valuable data insights required to transform and modernize our customers' businesses. Our capabilities focus on developing proof of concepts to validate hypotheses and once proven right, scale the solution appropriately to achieve the desired results.

Intelligent Applications

- Tuatara helps modernize your company's application portfolio leveraging emerging technologies to stay agile and relevant. Capabilities range from legacy application modernization and migration to modern mobile-first net application development.

Cloud

- Tuatara helps companies leverage cloud technologies to transform their business. Capabilities include maturity assessments, migrations, operations modernization, new builds, DevOps, and automated infrastructure deployment.

Staffing

- Tuatara has access to an expansive network of business and technology talent that includes both onshore and offshore resources. Roles include Business Consultants, Business Analyst, Project and Program Managers, Architects, and Engineers across all the major platforms and cloud based Technologies. Tuatara also takes a great deal of pride in being able to access and partner with national Veteran talent. In a time where talent is in short supply, we have the resources and reach to deliver.
